

When meetings
really matter

Web meetings

Talk to customers and colleagues via Skype, Microsoft Office Communicator, or other communications software using Konftel as your audio source.

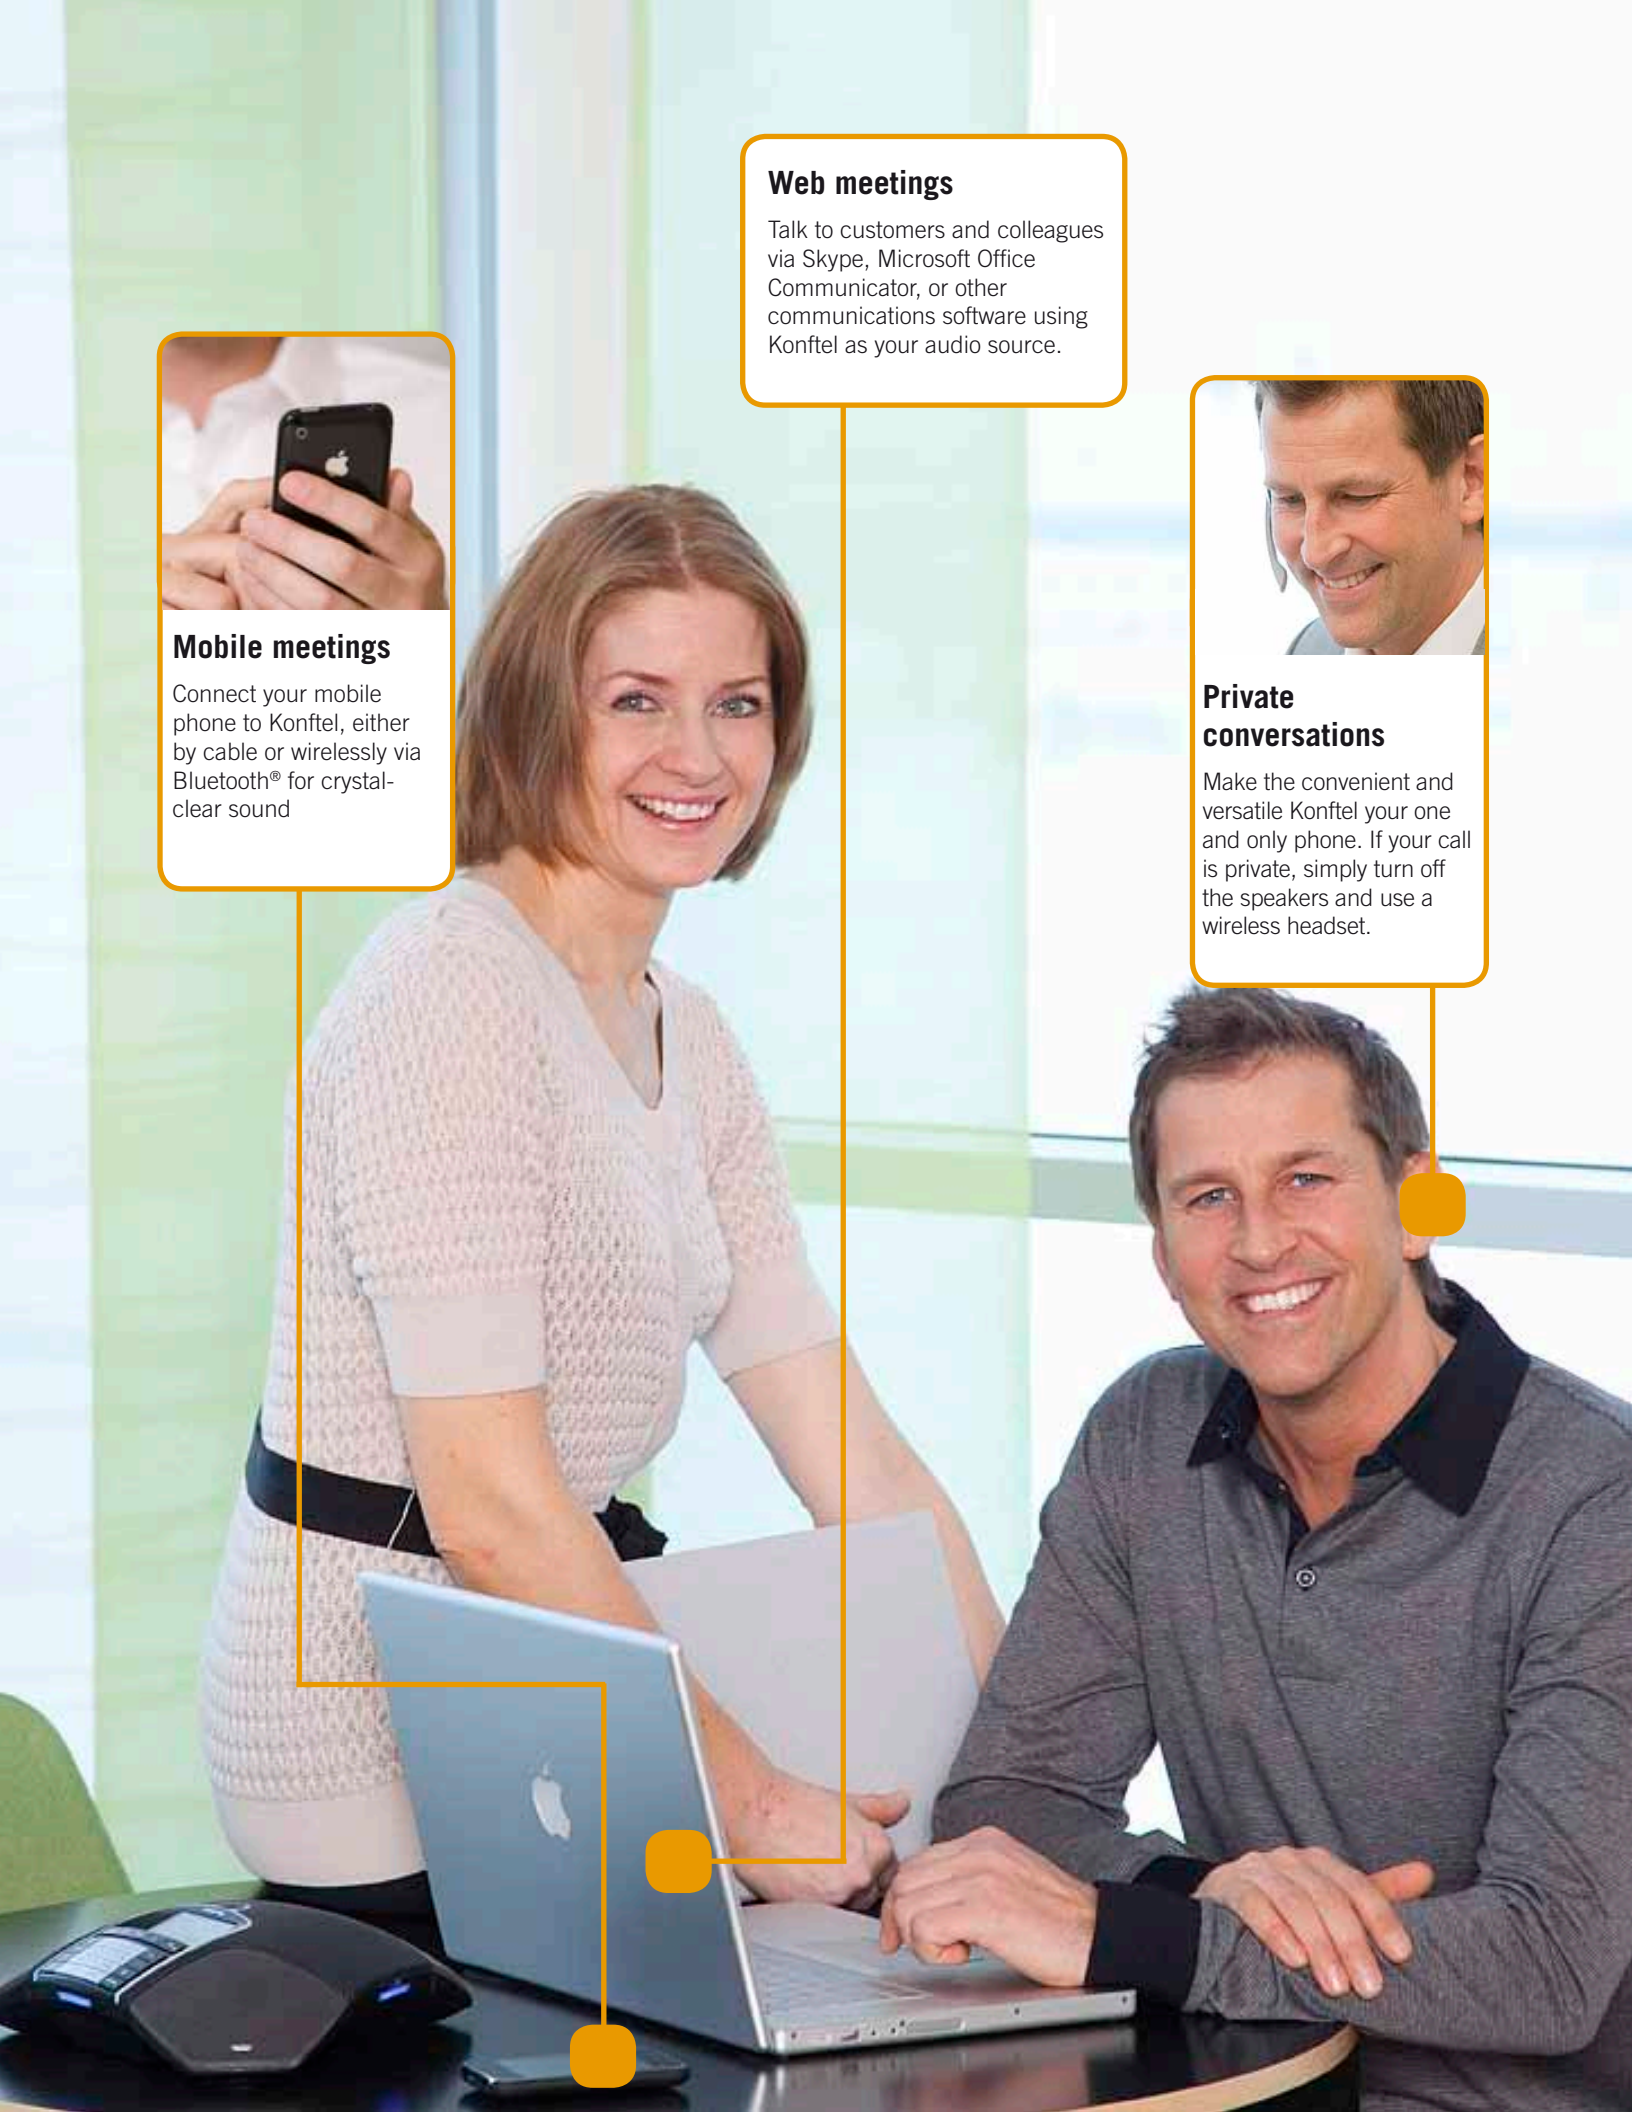

Mobile meetings

Connect your mobile phone to Konftel, either by cable or wirelessly via Bluetooth® for crystal-clear sound

Private conversations

Make the convenient and versatile Konftel your one and only phone. If your call is private, simply turn off the speakers and use a wireless headset.

I find short and spontaneous phone meetings perfect for dealing with all questions.

Spontaneous meetings simplified with Konftel

With a Konftel unit on your desk, time and distance are no longer obstacles. It's fast and simple to hold spontaneous meetings without leaving the office or losing precious work time.

You can quickly arrange ad hoc meetings to discuss small details that might otherwise delay critical projects, or effortlessly meet with the entire team to consider large questions and share the latest information. And with a Konftel conference phone on your desk, it's equally easy to conduct regularly scheduled meetings.

Fixed telephony is only one method of communicating at a distance. Telephony has stepped into the world of information technology to meet today's ever-increasing demand for fast and efficient communications.

Unified communications (UC) enables seamless integration between all forms of communication — including mobile phones, computers, and fixed-line phones. Our conference phones harness the inherent power and versatility of UC technologies.

Our products offer a wide range of application and connectivity options that you can extend to meet your changing needs. In other words, Konftel phones can grow with your business and deliver top performance in every situation.

Konftel represents flexibility and user-friendliness combined with superlative OmniSound® HD audio quality.

Konftel, the hub of your UC environment!

The Konftel 300 and other Konftel phones have built-in bridging capabilities for connectivity to office communications equipment, enabling multiparty calls between computers, mobile phones, and regular phones.

Distance is no barrier
with a Konftel.

Efficient meetings enabled by smart support features

The most traditional way of conducting teleconferences involves gathering onsite colleagues in the conference room and calling other participants on the phone. Good sound quality is critical for keeping concentration levels high and meetings efficient in this situation.

That's why Konftel's conference phones incorporate OmniSound®HD, which delivers superb audio quality even in large meetings. In addition to sound quality that keeps everyone on the same page, you'll appreciate your Konftel's flexibility.

Expansion microphones more than double your phone's pickup range, allowing more people to actively participate. You can even connect a wireless headset to models that simultaneously transfer sound from the conference phone and the headset — a particularly useful feature when the person speaking isn't near a microphone.

Because Konftel's design objective is greater ease of use, our products incorporate numerous smart features.

The conference guide provides instructions for making multiparty calls and for preprogramming call groups, allowing you to reach multiple colleagues with the press of a single button.

Our built-in recording capability makes it simple to document calls. This highly useful feature is perfect for colleagues who are unable to attend meetings, and for double-checking meeting decisions. You can replay recorded files on the phone or transfer the memory card to a computer that has an SD memory card reader.

When you want participants to see one another or watch a presentation together, they can use their computers with cameras or a shared screen. Konftel conference phones provide the perfect audio solution — whatever the situation.

Web and video meetings

Enhance the audio quality of your Web and video meetings. Konftel's line mode provides the option to transmit sound via your phone or computer network.

Conference guide

Call meeting participants with the simple push of a button. The guide provides instructions for programming multiparty calls and regularly scheduled meetings.

Recording calls

Record your meetings or or use it as a dictation device.

Flexibility

Move Konftel's wireless models to different conference rooms effortlessly.

Extensibility

Increase your phone's voice pickup range with expansion microphones.

Remote location

Wear a wireless headset to deliver your presentation from the whiteboard at the front of the room. With Konftel, you know that everyone can hear you clearly.

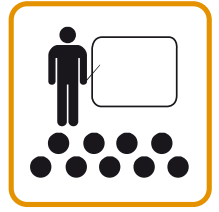

Seminars

Make use of the room's PA system and speakers by connecting them to the Konftel. This is especially valuable at events when an audience is listening to a speaker and remote participants are on the line. Use handheld microphones when the audience is invited to ask questions.

Many active participants

Use the PA system's microphones and speakers at large meetings with lots of active participants.

”

There's no restriction on the number of participants when you have a PA system connection.

High-profile, major events enhanced by Konftel

Konftel's versatility and audio quality enhance conferences and meetings in large lecture halls and auditoriums.

With our comprehensive capacity to deliver top performance at major events, your guests can enjoy an unrivalled sound experience — regardless of their physical locations or levels of participation.

When you connect your Konftel to a PA system with speakers and microphones, guests can attend from remote locations, and can even enhance their listening experiences with wireless headsets. In-house participants, on the other hand, can join the discussion during question-and-answer periods by using wireless hand-held microphones.

Moreover, speakers are free to move about, confident that both remote and in-house audiences can hear their voices distinctly and clearly.

Konftel connects to a PA system to deliver crystal-clear sound and is an excellent choice at major events where presentation standards are high.

PA system connection

Available as an option, the Konftel interface box enables you to connect the Konftel 300 and Konftel 300IP to a PA system.

Top businesses increasingly save time and travel costs — and benefit the environment — by using remote technologies to conduct meetings. Konftel provides the crystal-clear sound technology that makes spontaneous meetings possible and productive. Our solutions satisfy the requirements for virtually every meeting. This brochure explains the advantages Konftel can bring to your business.

ABOUT US

Konftel is an industry leader and has the world's fastest growing brand within audio conferencing equipment. Since 1988, our mission has been to help people around the world to conduct meetings despite distances. Based on our success, we know that audio conferencing is a great way to save time, money and at the same time contribute to a better environment. High audio quality is essential for efficient meetings, and this is why our patented OmniSound® HD audio technology is built into all Konftel conference phones. The company's products are sold globally under the Konftel name and our headquarters are in Sweden.
